

WOLFF CHAIN PACKS

Lifting chain assemblies play a vital role in supporting and hoisting heavy loads vertically and horizontally across construction sites. WOLFF Chain Packs are engineered to withstand immense loads and harsh working conditions, ensuring safety and reliability during lifting operations. Their robust construction and high tensile strength make them essential for maintaining stability and precision while manoeuvring heavy materials such as steel beams, concrete panels and construction equipment.

WOLFF Onsite have created various chain pack options to suit all lifting requirements.

Key Benefits

- Chain pack options to suit lifting and moving requirements
- Heavy duty chain and hooks
- Durable steel
- Supplied with EC Declaration of conformity
- Assembled in the UK by our trained technicians

Small Chain Pack	80000021
1 x Single leg chain	
1 x Two legged chain	
1 x Four legged chain	
1 x Master link	
Medium Chain Pack	80000020
1 x Single leg chain	
1 x Two legged chain	
1 x Four legged chain	
1 x Master link	
Large Chain Pack	80000019
1 x Single leg chain	
1 x Two legged chain	
1 x Four legged chain	
1 x Master link
